

AXA Bike Security

AXA Bike Security is inextricably linked to cycling culture. For more than 115 years, the company has made every effort to protect cyclists and their bikes. As a genuine bike fan, AXA Bike Security knows exactly what cyclists need to safely and confidently take to the road.

Our engineers convert the latest requirements and developments into user-friendly, sustainable products. And thanks to our own production facilities in Europe, AXA can always guarantee constant high quality. This way AXA contributes to the safety and pleasure of the growing worldwide group of people who embrace the bike as a healthy and sustainable means of transportation.

Compact rear light

The AXA Juno has a very minimalistic design, thanks to the smallest reflector on the market! The AXA Juno can be powered by dynamo, E-bike (6-12V) or regular batteries. For extra safety you are visible from the side.

Minimum size, optimal safety

New design

The Juno can be mounted at 50 or 80 mm. The light has an ergonomic on/off switch. All the Juno versions have the German StVZO approval.

Steady function

The dynamo version has a steady light function which ensures that your bicycle light keeps shining up to 4 minutes when stopping for example at a traffic light. This provides additional visibility on the road, even if you don't ride! The dynamo version can also be connected directly to a 6V E-bike battery.

With battery low indicator

Battery version

The battery version works on two AAA batteries which are easily replaceable. The light has 50 hours of cycling pleasure. With the battery almost empty indicator you never ride your bike without a light.

Auto off function

We have a battery version with an auto off function. This means that the light switches off automatically after 5 min. without movement. Ideal for when you often forget the turn off your lights.

Easy to mount at 50 or 80 mm
